Energy Efficient

One of four building modules ready for shipping

The Need

Immediate deployment of research facility to rapidly diagnose Highly Pathogenic Avian Influenza (HPAI) should the H5N1 strain appear in the United States.

The Challenge

Coordinating the design-build process between Iowa State University and the U.S. Department of Agriculture.

The Result

A state-of-the-art research facility delivered and operating within seven months.

Facts & Figures

Owner: United States Department of Agriculture

Type of Project: BSL-2 enhanced

Location: Ames, Iowa

General Contractor: Lockard Construction

Size: 5,683 square feet in four buildings

Construction Time: 7 months
